- Fast recognition of the garments on the hanger
- Rapid mats identification
- Rugged housing for long working life
- Can be up to 15 m away from the reader
- High reading speed (< 20 msec)
- Reading distance up to 17 cm

### Product Description

The DATAMARS A-PO7500 RING industrial antenna has been developed for all cost-effective applications where manual reading with immediate data transmission has to take place.

Thanks to its long cable, the A-PO7500 RING antenna has been successfully implemented in dust control where mats or bags of mops are being read while being loaded on trucks.

# LF RING ANTENNA

## A-PO7500 RING

### Technical data

Dimensions	Ring external diameter: 160 mm Antenna length: 370 mm
Weight	0.97 kg
Temperature	Storage: -20°C – + 70° C (-4°F – +158°F) Operating: -15°C – + 60°C (- 5°F – +140°F)
Reading speed	< 20 msec/reading
Reading distance	Up to 170 mm with Transponder T-BT7700
Power supply	Through reader R-IN7500 NMS
Casing	Material: Polyethylene
Connection	3 m antenna cable with DIN 6 connector included, other cable length on request
